

## DNS Årsmøde 2024

### Oral presentations

<b>Cardiovascular disease and hypertension</b>	
10.00-10.05	Acute myocardial infarction and chronic kidney disease: A nationwide cohort study on management and outcomes from 2010-2022 <i>Ellen LF Ballegaard, Rigshospitalet</i>
10.05-10.10	Secretoneurin as a prognostic biomarker for cardiovascular events in patients receiving maintenance hemodialysis. <i>Caroline Hundborg Liboriussen, Aalborg Universitetshospital</i>
10.10-10.15	Twenty-four hour and unobserved blood pressure measurements in a Renal Outpatient Clinic – does it show the same? <i>Bodil Gade Hornstrup, Gødstrup Hospital</i>
10.15-10.20	Is the effect of sodium-glucose cotransporter 2 inhibition on blood pressure related to estimated glomerular filtration rate? <i>Charlotte Agergaard Møller, Gødstrup Hospital</i>
<b>Chronic kidney disease and diabetic kidney disease</b>	
10.20-10.25	Prevalence of unrecognized chronic kidney disease in the Lolland-Falster Health Study. <i>Ebba Mannheimer Rigshospitalet</i>
10.25-10.30	SGLT2i and renal perfusion <i>Steffen F Nielsen, Gødstrup Hospital (Frank Mose)</i>
10.30-10.35	The prevalence of monogenic kidney disease in patients with undetermined kidney failure using multi-faceted genetic screening. <i>Jeff Granhøj, Forskningsenhed for Klinisk Genetik Vejle</i>
10.35-10.40	Diagnostic validity of ICD-10 codes for renal diseases in the Danish National Patient Registry: Results from a single-center outpatient clinic. <i>Josefine Ilsø Jensen, Aalborg Universitetshospital</i>
10.40-10.45	Progression to end-stage kidney disease in Type 2 Diabetes by histological findings: A retrospective cohort study. <i>Karina Haar Jensen, Roskilde Universitetshospital (Iain Bressendorff)</i>
<b>10.45-11.10</b>	<b>Coffee Break</b>
<b>Transplantation and immunology</b>	
11.10-11.15	Posttransplant kinetics of Torque Teno Virus in adult and pediatric kidney transplant recipients: A comparative analysis. <i>Ann-Maria Gramkow, Odense Universitetshospital</i>
11.15-11.20	Chronic kidney disease alters RNA splicing of FOXP3, an essential part of the immune system's transcriptome. <i>Qais Waleed Saleh, Odense Universitetshospital</i>
11.20-11.25	The clinical utility of systematic screening of aortoiliac vessels by CT angiography before kidney transplantation. <i>Marie Bodilsen Nielsen, Aarhus Universitetshospital</i>

<b>MBD, electrolytes and acid-base disorders</b>	
11.25-11.30	The effect of a low Potential Renal Acid Diet on metabolic acidosis in patients with chronic kidney disease stage 4 and 5. <i>Anna Elvina Wittendorff Pedersen, Københavns Universitet</i>
11.30-11.35	Effects of Exogenous Ketosis on Renal Function, Renal Perfusion, and Sodium Excretory Capacity in Healthy Subjects (KETO). <i>Trine Züricho Lyksholm, Gødstrup Hospital</i>
11.35-11.40	PTH bestemt med 2. og 3. generationsmetode hos patienter med varierende grad af kronisk nyreinsufficiens. <i>Ida Marie Nørum Wigh, Aalborg Universitetshospital</i>
11.40-11.45	A distinct bone and mineral phenotype in patients with type 2 diabetes and chronic kidney disease grade 5-5D. <i>Sabina Chaudhary Hauge, Herlev Hospital</i>
<b>Glomerular disease</b>	
11.45-11.50	Impact of Oedema on Morbidity and Mortality in Nephrotic Syndrome: A Cohort Study. <i>Sarah Kelddal, Aarhus Universitetshospital</i>
11.50-11.55	Prevalence and prognostic relevance of electrocardiographic abnormalities among patients with ANCA-associated vasculitis. <i>Louis Bay Nygaard, Aalborg Universitetshospital</i>
11.55-12.00	Time dependent changes in the treatment of relapsing Minimal Change Disease - a multicenter cohort study. <i>Tilde Kristensen, Regionshospitalet Viborg</i>
12.00-12.05	The validity of SNOMED II Codes for Biopsy-confirmed kidney disease in the Danish National Patobank. <i>Marie Møller, Herlev Hospital</i>
<b>Dialysis</b>	
12.05-12.10	A single far infrared treatment on the arteriovenous fistula during a hemodialysis treatment cause no change in factors of inflammation, vasodilation, and endothelial function from the arteriovenous fistula during a hemodialysis treatment. <i>Emilie Klara Hansen, Herlev Hospital</i>
12.10-12.15	Far infrared radiation does not improve time to cannulation in newly placed arteriovenous fistulas in patients on hemodialysis. <i>Kristine Lindhard Rasmussen, Herlev Hospital</i>
12.15-12.20	Early surgical complications and catheter survival comparing peritoneal dialysis catheter insertion by laparoscopy and laparotomy. <i>Regitze Helena Bonde, Aarhus University Hospital</i>
12.20-12.25	Cardiac arrhythmia and hypoglycaemia in patients receiving hemodialysis with and without diabetes (the CADDY study): a Danish multicentre cohort study. <i>Dea Haagensen Kofod, Rigshospitalet</i>
12.25-12.30	Nutritional assesment of hemodialysis patients by bioimperdance spectroscopy and BMI. <i>Kezia McWhan, Gødstrup Hospital</i>
